SUMMARY

A disciplined and committed person. Devoted to planning, overseeing, and taking part in competitions and events; always up for a challenge. I've been seen by others as someone who works hard, is accountable, is on time, and successfully completes tasks.

EDUCATION AND CERTIFICATION

BACHELOR OF TECHNOLOGY IN COMPUTER SCIENCE (CYBERSECURITY)

(2022 - Present)

Kalasalingam Academy of Research and Education

HIGHER SECONDARY EDUCATION

(2015- 2022)

Jawahar Navodaya Vidyalaya Ongole

APPLIED AI MASTERY

Infoziant's Edutech

PROJECTS

PROJECT AGEIS (CHAT APPLICATION USING QUANTUM CRYPTOGRAPHY)

[LINK](#)

- Designed and implemented the backend API and real-time messaging using Flask + Flask-SocketIO, implementing server-side sessions and HttpOnly cookies to secure authentication and Socket.IO connections.
- Integrated educational post-quantum cryptography modules (BB84 quantum key exchange simulation, Kyber KEM for key encapsulation, Dilithium digital signatures) to demonstrate quantum-secure key exchange and signing flows.
- Built a responsive React 18 frontend with Socket.IO client integration and secure API calls (withCredentials: true), designed pages/components/services for register/login and encrypted chat.

CRYPTO LAB (A VIRTUAL LAB ON CRYPTOGRAPHIC ALGORITHMS)

[LINK](#)

- Hands-On Cryptography - Provides an interactive platform to explore encryption, decryption, and hashing techniques.
- User-Friendly Web Interface - Built with Streamlit offering an intuitive experience for selecting and testing algorithms.
- Real-Time Execution - Enables instant encryption, decryption, and hashing, displaying results dynamically on the web interface.

MEDICONNECT (HEALTHCARE COORDINATION & TELEMEDICINE PLATFORM)

[LINK](#)

- Integrated Healthcare Ecosystem: Engineered a comprehensive platform using React 18 and TypeScript that features distinct, high-performance dashboards for both patients and doctors to manage appointments and medical records.
- AI-Powered Triage & Telemedicine: Developed a custom AI Health Assistant for automated symptom assessment and specialist recommendations, integrated with a video consultation system for remote patient care.
- Medical Commerce & Diagnostics: Implemented a full-scale Pharmacy marketplace and Lab Test booking system, featuring complex cart logic, secure transaction simulations, and digital health report management.

ACHIVEMENTS

1ST RUNNERUP IN INNOVATRON (NATIONAL LEVEL HACKATHON) IN KARUNYA UNIVERSITY

we had developed a Healthcare Coordination & Telemedicine Platform by using the React, Nodejs, and supabase and we had written a RAG architecture for Telemedicine and Disease prediction)

1ST RUNNERUP IN INTELICOUTURE (INTER LEVEL HACKATHON ON GEN AI)

we had developed an application which uses AI to evaluate the answers according to the rubrics assigned by the faculty and it suggest the student to update his answer to match the rubrics

PUBLICATIONS

PROJECT AEGIS: A HYBRID PQC-QKD FRAMEWORK FOR RESILIENT COMMUNICATION

[LINK](#)

PROJECT AEGIS a new hybrid paradigm/schema that utilizes Quantum Key Distribution (BB84 protocol) in conjunction with Post Quantum Cryptography (CRYSTALS-Kyber/Dilithium lattice based protocols), that together realize a defense-in depth communication security that is immune to both classical and quantum adversaries.
